ARTICLES	MOUNT PLATES	VEHICLE MAKES	BLADE WIDTH, IN

DENALI PLOWS

THE WHOLE PLOW, PART BY PART.

A complete ATV and UTV snow plow programme: blades, the push tubes and lift arms that carry them, hydraulics, the wear parts that are meant to be used up, and 87 mount plates that put the system on your machine.

Only the mount plate depends on the machine. Everything else is shared across the range, so a handful of blades covers 16 vehicle makes, and the plate stays on the machine all year.

FAMILY	ARTICLES
Blades	7
Push tubes and lift arms	5
Hydraulic blade angling	1
Wear bars	10
Rubber flaps	8
Accessories	6
Mount plates	87
Total	**124**

Article numbers are the manufacturer's own, the numbers to order by.

WINCH REQUIRED

Every Denali plow is raised and lowered by a winch, and no article in this book includes one. A 2 500 to 4 500 lb (1130 to 2 040 kg) winch is sufficient. Winches and winch mounts are in the Viper catalogue.

THE RANGE AT A GLANCE

124 articles in six families. Every one is ordered on its own; together they make a plow.

7
BLADES
50 in (1270 mm) to 72 in (1829 mm), standard and Pro series, black powder coat.

01
MOUNT PLATE

Cut for this machine, bolted to the frame. Stays on all year.

MA11707

02
PUSH TUBE

A UTV plate takes the UTV lift arm; an ATV plate the ATV push tubes.

PTUT

03
BLADE

Any UTV width: 60, 66 or 72 in, standard or Pro.

BL66STBK

THE WINCH LIFTS

On every machine, with or without hydraulics. A 2 500 to 4 500 lb (1130 to 2 040 kg) winch is sufficient. The pulley fairlead kit turns the winch line up to the blade and has to match the spool.

THE HYDRAULICS TURN

HYPro-MA11208_H angles a UTV blade left and right from a dash switch. It does not lift, and it does not replace the winch.

SIX RULES THAT SAVE A RETURN

1. The UTV mount plates do not include the quick release pins that hold the push tube. Add a pair, CFG_Plow_Pins/UTV.
2. The extended push tubes, PTUT_LAEXT, add 15 in (381 mm) of reach. They do not take the lift kits.
3. The lift kits, PTUTLIFT2 and PTUTLIFT4, bolt to the standard UTV push tubes only.
4. Neither the extended push tubes nor the lift kits work with mount plate MA11752.
5. Box ends, BLUTST_BoxEnd, fit the standard UTV blades of 60, 66 or 72 in. Not the Pro blades.
6. Hydraulic angling fits the standard and Pro UTV push tubes. The joystick needs both the hydraulics and a winch.

A COMPLETE PLOW, LINE BY LINE

What goes on the order for one machine. Find the plate in the schedule first: it decides the push tube.

ATV

4 LINES AND A WINCH

PRO
BLPro66BK · BLPro72BK

POLYURETHANE WEAR BAR
BL66STBK_Poly

ORDERED ON ITS OWN

A blade is the blade: no push tube, no plate. Black powder coat is standard.

BL66STBK_Poly ships with the polyurethane wear bar, a rubber flap and marker flags.

STANDARD SERIES, AS BUILT

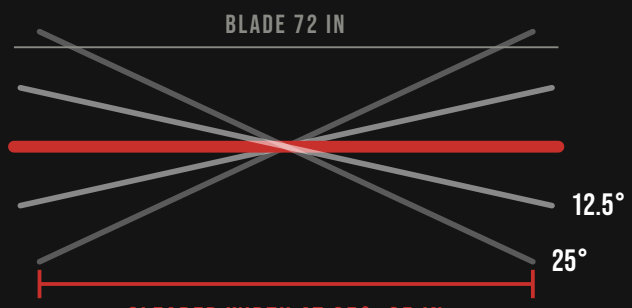

MOULDBOARD	Scoop height 17 in (432 mm), formed with the leading supports from one piece of 11 gauge steel
RIBS	Four 7 gauge ribs, full height, and three 7 gauge horizontal stabilisers
ATTACK ANGLE	65°, over-centre: the snow rolls up and is thrown forward
EDGE	Replaceable wear bar, 7 gauge grade 50 steel, one supplied
SKID FEET	Height and angle adjustable, supplied

As published by the manufacturer for the standard ATV blade.

02 · BLADES

WHICH WIDTH?

The blade has to be wider than the machine, or the tyres run in the snow the blade has just left. Angle it and the cleared width drops: pick for the angle you plow at.

Top view, to scale. Five positions: straight, 12.5° and 25° to either side.

CLEARED WIDTH BY ANGLE

BLADE	USUAL MACHINE	AT 12.5°, IN	AT 25°, IN	ARTICLES
50 in (1270 mm)	ATV	48.8	45.3	**BL50STBK**
60 in (1524 mm)	ATV · UTV	58.6	54.4	**BLST60UTV**
66 in (1676 mm)	UTV	64.4	59.8	**BL66STBK BL66STBK_Poly BLPro66BK**
72 in (1829 mm)	UTV	70.3	65.3	**BLPro72BK**

ATV OR UTV

On an ATV the blade is normally 50 or 60 in; on a UTV 60, 66 or 72 in. The push tubes set five positions: straight, 12.5° and 25° either way.

HOW IT IS WORKED OUT

Cleared width is the blade width times the cosine of the angle. At 25° a blade clears about nine tenths of its width.

03 · PUSH TUBES

WHAT CARRIES THE BLADE

The push tube carries the blade from the plate and sets its angle. ATV and UTV tubes do not swap, and the plate decides which one.

ARTICLE	PART	USE WITH
PTAT	Push tubes, ATV	Every ATV plate
PTUT	Lift arm, UTV	Every UTV plate
PTUTLIFT2	Lift kit for UTV push tubes, 2 in (50 mm)	Machines 13 in (330 mm) to 15 in (381 mm) off the ground
PTUTLIFT4	Lift kit for UTV push tubes, 4 in (100 mm)	Machines 15 in (381 mm) to 17 in (432 mm) off the ground
PTUT_LAEXT	Extended push tubes, UTV	15 in (381 mm) longer than standard
HYPro-MA11208_H	Hydraulic blade angling for UTV, with dash switch	Standard and Pro UTV push tubes

ATV PUSH TUBES
PTAT

UTV LIFT ARM
PTUT

HYDRAULIC ANGLING
HYPro-MA11208_H

HEIGHT AND REACH

The blade has to sit level on the ground, so the tube height has to match the machine. On a lifted UTV, oversize tyres or a skid plate, a lift kit bolts to the standard UTV push tubes and brings them back down to the plate.

The extended push tubes are for a long front overhang. They replace the standard tubes and do not take a lift kit. Neither works with plate MA11752.

HYDRAULIC ANGLING, HYPRO-MA11208_H

TURN	Full sweep side to side in about 10 seconds, from the seat, while driving
CYLINDER	Chrome-plated shafts, 0.8 in (19 mm)
OVERLOAD	Relief at 4 000 lb (1 814 kg) out, 3 500 lb (1 588 kg) in
FLUID	Sealed for life: no reservoir, no bleeding, no fluid to buy
FITTING	Two bolts for cylinder and pump; flush dash switch, contactor, weatherproof harness
BY HAND	The blade can still be angled by hand

04 · WEAR PARTS

MADE TO WEAR OUT

Every wear part is cut to a blade width. Find your blade width and read across: that row is every edge and flap that fits.

BLADE	STEEL	STEEL, PRO	POLYURETHANE	RUBBER FLAP	FLAP KIT
50 IN 1270 mm · ATV	WB50_Stnd	—	WB50_Poly	RF50	RF50_Kit
60 IN 1524 mm · ATV	WB60_Stnd	—	WB60_Poly	RF60	RF60_Kit
66 IN 1676 mm · UTV	WB66_Stnd	WB66_Pro	WB66_Poly	RF66	RF66_Kit
72 IN 1829 mm · UTV	WB72_Stnd	WB72_Pro	WB72_Poly	RF72	RF72_Kit

POLYURETHANE, FITTED

STEEL WEAR BAR

RUBBER FLAP KIT

STEEL

Grade 50 steel, the edge the blades ship with. Reversible, and the one for gravel. The Pro bars fit the Pro blades.

POLYURETHANE

Quiet, does not spark, and does not mark pavers, stamped concrete or asphalt. Reversible.

RUBBER FLAPS

Stops the blade throwing snow over the top. The flap alone replaces a worn one; the kit adds the hold-down bar and hardware.

05 · ACCESSORIES

ASK FIRST, THEN ORDER

Two of these depend on the winch already on the machine. That question is quicker to ask than a return.

ARTICLE	PART	FOR
MA11209	Joystick for UTV plow	UTV with hydraulic angling and a winch
MA11212	Pulley fairlead kit, standard spool	Winch spool 3 × 4 7/8 in (76 × 124 mm)
MA11212W	Pulley fairlead kit, wide spool	Winch spool 3 × 6 2/3 in (76 × 169 mm)
PFUT	Marker flags, pair	Standard and Pro blades
CFG_Plow_Pins/ATV	Quick release pins, ATV, pair	Push tube to ATV plate
CFG_Plow_Pins/UTV	Quick release pins, UTV, pair	Push tube to UTV plate; not included with the plate

PULLEY FAIRLEAD KITS COME IN TWO

A plow lifted by a winch needs a pulley in front of the fairlead so the line pulls up, not forward. The kit replaces the winch fairlead for the season, and winch spools come in two bolt patterns that do not swap: standard and wide.

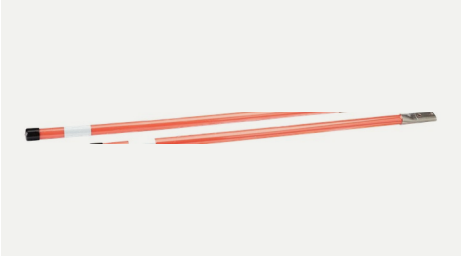

IN THE KIT

Roller fairlead with a curved groove and several roller positions, for steel or synthetic line. **Sheave** with pulley, clevis hook and nylon strap. **Plow line**, 12 ft (3.7 m) of single-braid Dyneema with a galvanised thimble.

The joystick raises, lowers and turns the blade from one stick in the cab. It needs the hydraulic angling and a winch, and works as a winch control off season.

PULLEY FAIRLEAD KIT
MA11212 · MA11212W

MARKER FLAGS
PFUT

ROLLER, STANDARD SPOOL
MA11212

MARKER FLAGS

Orange, stainless base, flexible down to −50 °F (−46 °C). A pair marks the blade ends from the seat.

QUICK RELEASE PINS

Lock the push tube to the plate. One pair per machine; the UTV plates ship without them.

THE WINCH

2 500 to 4 500 lb (1130 to 2 040 kg) is sufficient. Not in this book: see the Viper catalogue for winches and mounts.

06 · FITTING

FITTED ONCE. ON ALL WINTER.

The order the parts go on, and what to check while they are on.

1 BOLT THE PLATE TO THE FRAME

With the hardware and instructions in the box. Fitted once, left on. The Maverick X3 plate, MA11749, uses the winch mount plate supplied with it.

2 SET UP THE WINCH

For the season the pulley fairlead kit replaces the winch fairlead. The sheave raises the angle of pull for finer control.

3 PIN THE PUSH TUBE

Quick release pins: tube and blade come off in minutes. The UTV plates need the separate pair.

4 SET THE ANGLE

Straight, 12.5° or 25° to either side on the push tubes. From the seat with the hydraulics on a UTV.

5 SET THE HEIGHT

Adjust the skid feet so the blade sits level. On a lifted UTV add a lift kit.

6 MARK THE ENDS

Marker flags on the blade ends, a rubber flap along the top edge.

THROUGH THE SEASON

TURN THE EDGE

Steel and polyurethane wear bars are reversible: turn before you replace. Keep a spare for January.

LEAVE THE PLATE ON

The plate bolts to the frame, not the bumper, and stays on all year. Only the pins come out.

IN SPRING

The original fairlead goes back on the winch. The plow joystick keeps working as a winch control.

07 · QUESTIONS

ASKED MOST

The questions that come back every season.

IS A WINCH INCLUDED?

No. Every plow is raised and lowered by a winch, and no article includes one. Check the machine has one before you order.

WHAT SIZE WINCH?

2 500 to 4 500 lb (1130 to 2 040 kg) is sufficient. The pulley fairlead kit is chosen from its spool: standard or wide.

DO THE HYDRAULICS LIFT THE BLADE?

No. They turn it left and right from a dash switch. The winch lifts, with or without hydraulics.

DO ATV AND UTV PUSH TUBES SWAP?

No. The plate decides: ATV plates take the ATV push tubes, UTV plates the UTV lift arm.

IS THERE A PLATE FOR MY MACHINE?

87 plates cover 16 makes, listed by make, model and year in the schedule. Not listed? Ask: a plate may exist that the list leaves out.

ARE THE PINS INCLUDED?

Not with the UTV plates: order CFG_Plow_Pins/UTV. Hardware and instructions for the plate are included.

DOES THE PLATE COME OFF WITH THE PLOW?

No. It bolts to the frame and stays on all year.

STEEL OR POLYURETHANE?

Steel for gravel; it lasts a season. Polyurethane for paved surfaces: quiet, no sparks, no marks.

MY MACHINE SITS HIGH.

Add a lift kit to the standard UTV push tubes so the blade sits level. Not with plate MA11752.

CAN I GET ANOTHER COLOUR?

Black powder coat is the finish in this programme.

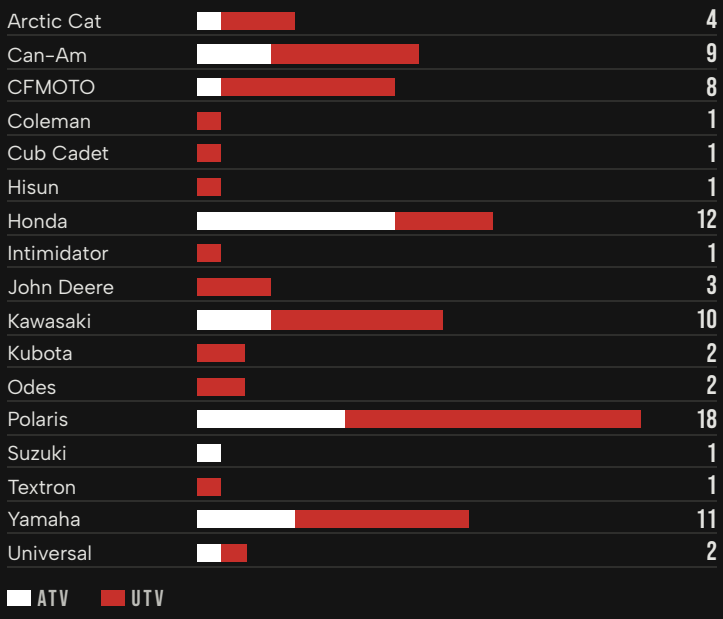

87 PLATES. ONE MACHINE EACH.

The plate is the only part that depends on the machine. It bolts to the frame, not the bumper, and stays on all year.

ATV PLATES	28. Laser-cut steel, 7 gauge (4.55 mm), as published for 27 of them. Black powder coat. ATV push tubes.
UTV PLATES	59. Laser-cut steel, 1/4 in (6.35 mm), black powder coat. UTV lift arm.
IN THE BOX	The plate, the hardware that fixes it to the frame, and instructions.
NOT IN THE BOX	Blade, push tube, winch. With the UTV plates, the quick release pins.

PLATES BY MAKE

The schedule, machine by machine, starts on page 15. Not listed? Send make, model and year to help@lionparts.com.

BEFORE YOU ORDER

01
MACHINE NOT LISTED?

Send make, model and year, a photo of the front of the machine if you can. We check it against the plate drawings and answer which plate fits.

help@lionparts.com

02
WARRANTY

Denali plows carry the manufacturer's warranty against defects. Keep the proof of purchase; claims go through the shop you bought from. Statutory consumer rights are not affected.

03
WHERE TO BUY

Denali is sold by Lionparts, online and through our dealers. Scan for every brand we carry.

LIONPARTS.COM

BUILT AROUND THE RIDER.

A customer service company first, and a parts company second.

FUELING FREEDOM & ADVENTURE.

Lionparts began in 2014 as an online retailer serving powersports riders. From the start we believed that finding the right part and getting the right help belong to the same experience.

Over the years we have grown beyond buying from the large distributors. We work long-term with established brands, independent manufacturers and specialists whose products do not always fit the traditional distribution model, and we connect them with the riders and dealers who need them.

Since 2025 we have been growing into Canada and Europe, with people on three continents and the same idea that built the business: service first, parts second.

Today the catalogue holds more than 200,000 products for ATV, UTV, motorcycle, snowmobile and marine. We ship more than 100,000 orders a year from our own fulfilment centre in upstate New York and from stock we buy ahead and position in warehouses across the country.

Alongside the brands we represent, we develop our own product lines, including EMBERON, KINTORQUE, RINFLO and UNBEHAVED. Each serves its own corner of the powersports market, shaped by what riders actually need and priced to give practical value.

Dealers welcome. Through our invite-only dealer programme we help dealerships, especially small and midsize ones, reach a broad range with competitive terms and support that answers.
